

NOKIA

ACCESSORIES

- Make the most of your Nokia mobile phone

With a complete range of Genuine Accessories, you can tailor your Nokia mobile phone to your individual needs. Here's a quick overview of what's available; everything from extra battery options to PC cards and coloured covers. Nokia Genuine Accessories come with a 12 month warranty (batteries 6 months). Remember, only Nokia Genuine Accessories are designed and tested by Nokia to maximise the performance and features of your phone.

power: No time-outs

If you are going to be using your phone all the time, or you're just out and about a lot, an extra battery makes a lot of sense. There are extended batteries available for all Nokia mobile phones. A desktop stand or fast charger makes sure that your batteries will be ready to go when you are.

personality: Colour your world

Many Nokia mobile phones can be made to stand out in the crowd by adding a coloured front cover. These covers should be fitted by a Nokia Authorised Service Centre. Ask your Nokia dealer about the range of covers available for your phone. Belt clips are the easy way to carry your phone when you're out and about.

on the move: Always in touch*

Nokia has a range of in-car accessories which ensure being on the move is no reason for being out of touch. Mobile chargers allow quick charging of your battery from the car's cigarette lighter. A Personal Handsfree Kit means you have the convenience of "handsfree" conversations. The Personal Handsfree Car Kit adds a mobile charger and phone holder for easy in car use, while a Complete Handsfree Car Kit offers a fully comprehensive in-vehicle solution.

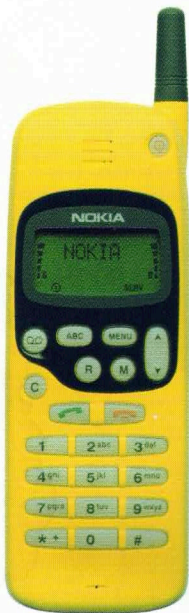

data: I'd rather be surfing

With a Cellular Data Card, most notebook PC's and Nokia 8110 or 2110 you can be faxing, sending e-mail and files, or surfing on the Internet, wherever you use your phone*. CellularWare lets you manage phone directories and short messages from your PC.

Please check the compatibility of any accessory with your cellular phone at your dealer.
